
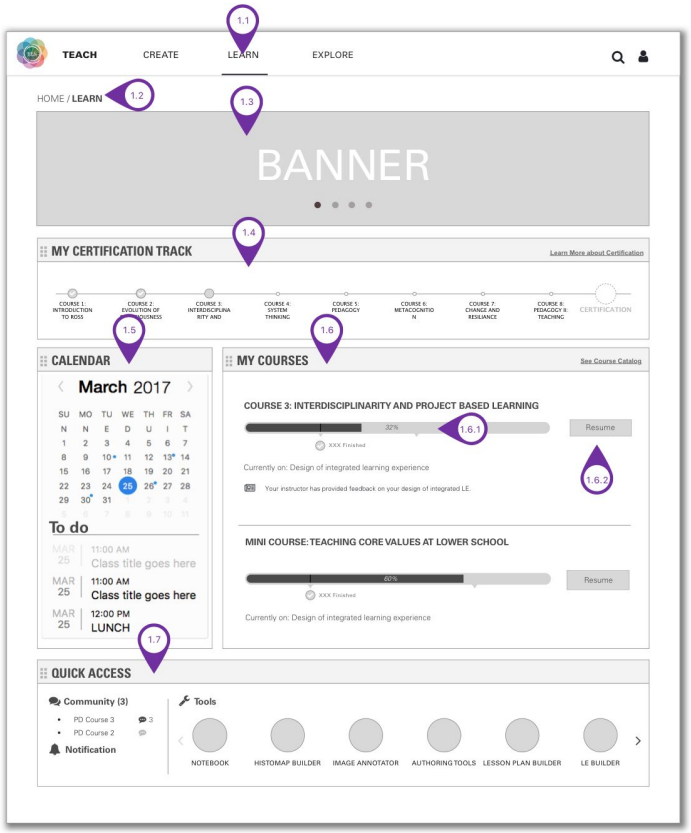
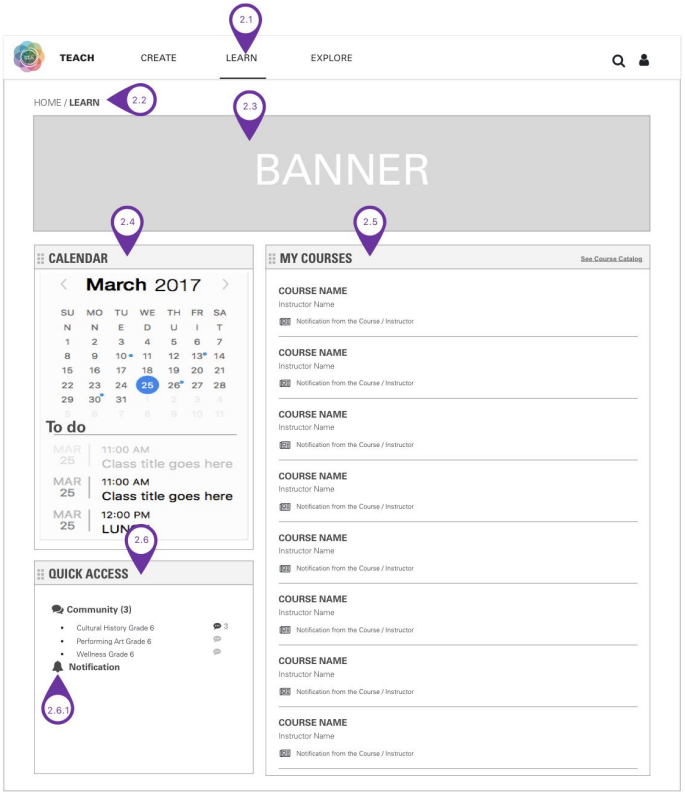
ID	ELEMENT NAME	DESCRIPTION	ACTIONS
1.1	Learn	Learn main menu nav button. This allows faculty to access PD and student to access their courses.	Click Learn button to go to the Learn Landing Page.
1.2	Learn (2)	LEARN bread crumb	Bread crumb serves as secondary menu navigation.
1.3	Banner	An area for PD to accommodate PD-specific news items (onsite PD and non-Ross PD announcements) and/or push in featured video PD content from **DRL**. Content can be separate from RLS certification / online courses: • summer academy and special Ross PD onsite events • non-Ross PD opportunities from external institutions • archives (from DRL) of both internal and external PD	DRL archive of onsite PD events will feature video links (via random selection from DRL). A Banner can display multiple events, each with a unique image and link, automatically sliding from one to the another. Clicking on banner of an event that is coming up takes Learner to the corresponding page in news feed. Clicking on banner of a featured resource take the Learner to the corresponding page in DRL.Clicking on banner of a past event and all the DRL resources associated with it take the Learner to the corresponding page in DRL. Banner should be automatically removed (hidden) when no events are set to go into the banner. The system will allow Admin to create new banner events, upload an image for the banner, assign a link to each Banner and remove a banner
1.4	My Certification Track	The system provides the user with a Certification/ program Track widget and a link to more info about Certification. In the future there may be multiple certification/ programs" tracks and/or custom certifications.	My Certification Track widget is only displayed for the Learners who are enrolled in the Certification Track The Certification Track widget, is both a set of links to each course and a progress bar that shows user progress through the courses. The progress bar links are animated. The system shall allow admin to edit Certification Track (changes to courses that comprise certification) as well as adding new tracks. This widget links to a separate static page that provides in depth information about the Certification.

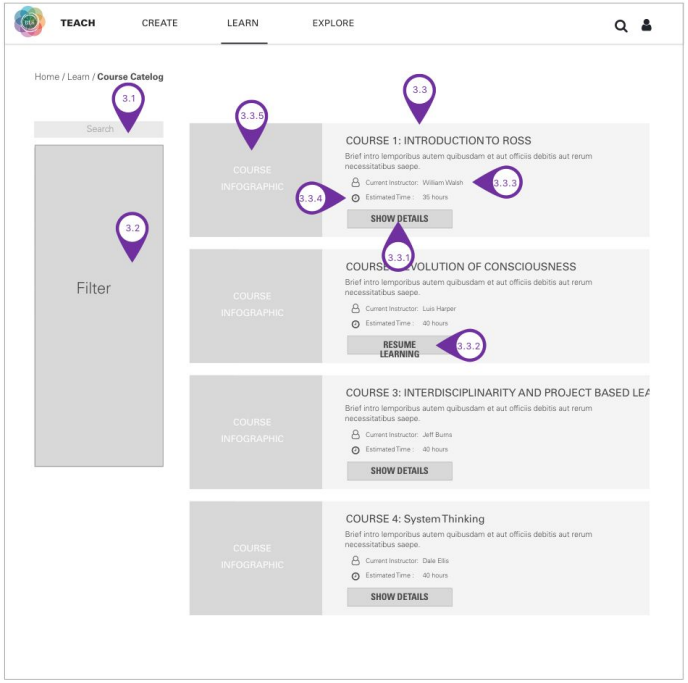


(This image is a Duplicate of the image in Previous Page)

1.5	Calendar	The system provides the user with a Calendar and To Do list that appears on the Learn Landing page and other RLS landing pages	This Calendar will be the same as all other calendars throughout RLS. The calendar can be populated with predetermined PD milestones and assignments by Facilitator or permissioned user in a separate calendar group. Each activity in an LE/ unit page can be assigned a date. If the date is assigned to an activity, the activity becomes a milestone that populates Calendar. All dates for activities are left blank by default.
1.6	My Courses	My Courses widget displays course information and links for the courses the user is taking If Learner is not enrolled in a course, s/he will see a visual message inviting him/her to explore the catalogue.	The system shall provide a My Courses widget with individual access links to the courses that one is taking and a link to course catalog. If Learner is not enrolled, s/he will see course catalog widget (it will move up.)
1.6.1	My Courses Progress Bar	Progress Bar for the courses Displays course progress through progress bar and milestones per course. When milestones accomplished a “complete” icon appears. There is no “complete” icon when milestone is not yet accomplished.	N/A
1.6.2	Resume Button	Button links back into the course where user left off	A learner clicks “Resume” button to go back to where he/she left off last time in the course.
1.6.3	Instructor Feedback	When an instructor/ facilitator provides a user feedback to an assignment, the system shall send the user a notification.	A learner clicks it to go to the **Grading Page** of the **Assignmen**t the Learner completed and submitted earlier
1.7	Quick Access	Integration with **Collaboration Tools / Community Forums** An interactive community space for PD users to interact	The system will provide PD users with quick link to tools and pages inside RLS platform.



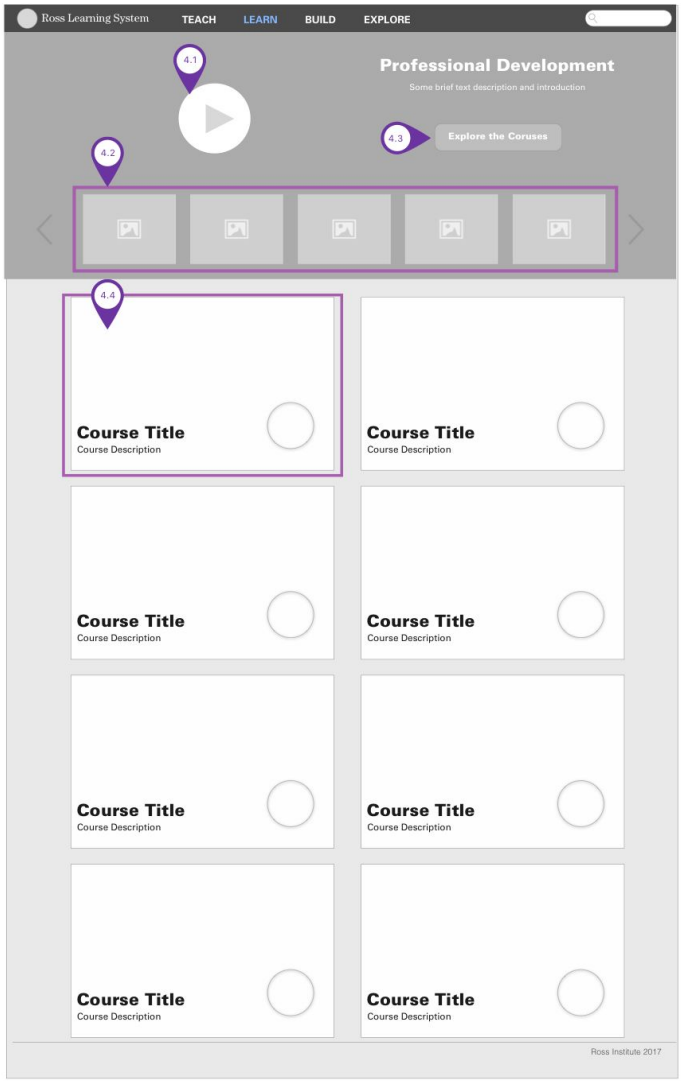
ID	ELEMENT NAME	DESCRIPTION	ACTIONS
2.1	Learn	Learn main menu nav button. This allows faculty to access PD and student to access their courses. Looks different for K12 student learners and adult learners.	Click Learn button to go to the Learn Landing Page.
2.2	Learn (2)	LEARN bread crumb	Bread crumb serves as secondary menu navigation.
2.3	Banner	An area for PD to accommodate non-Ross PD and onsite PD events. This is separate from RLS certification / online courses and can include: onsite Teacher Academy events such as summer retreat, mentor onsite presentations, special Ross PD events and archives of these events. Also included will be non-Ross PD opportunities from external institutions and archive of these events.	A Banner can display multiple events, each with a unique image and link, automatically sliding from one to the another. Banner should be automatically removed (hidden) when no events are set to go into the banner. The system will allow Admin to create new banner events, upload an image for the banner, assign a link to each Banner and remove a banner (needs wires)
2.4	Calendar	The system provides the user with a Calendar and To Do list that appears on the Learn Landing page and other RLS landing pages	Student view - TBD (needs wires) Admin view - TBD (needs wires)
2.5	My Courses	My Courses widget displays course information and links for the courses the user is taking	A user clicks “Course Name” to go to the corresponding course page.
2.6	Quick Access	TBD Needs wireframe	TBD Needs wireframe



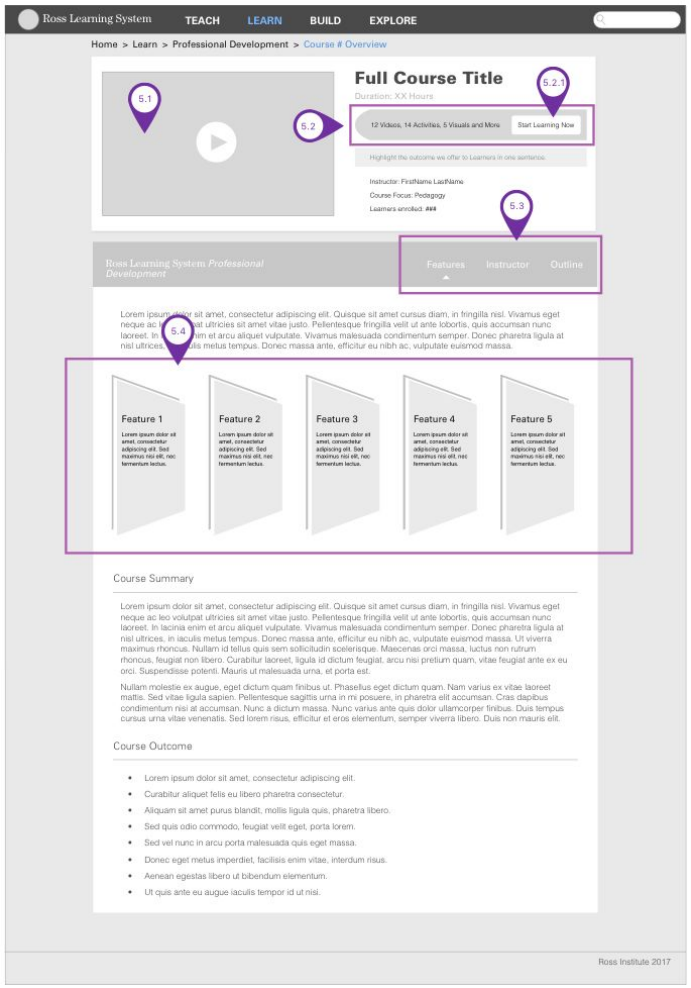
ID	ELEMENT NAME	DESCRIPTION	ACTIONS
3.1	Search Bar	User can **search** for course by Keywords. Search follows search behavior same as rest of RLS.	Typing in a word initiates a search of courses.
3.2	Filter	Any course tag could be a filter. For example, “Professional Development”, “Upper School”, “Lower School”, “Pedagogy”, etc. When filters are applied, search result is also affected by filter.	A user select a filter to apply filter. When a filter is selected, only courses belong to this filter appear on the right side. A user could select multiple filters simultaneously. A user could combine the use of search and filter. When filters applied, search result is affected by filters. The sequence of using search and filter does not matter.
3.3	Course Information	Shows all course details Course Name, Syllabus, Facilitator, Video Instructor, Mentor/s etc.	N/A
3.3.1	Show Details Button	Button links to Course Details page, for designated course. This button only applies to courses a user has not started.	A user clicks “Show Details” button to go to course detail page of this course.

A user clicks “Resume Learning” button to resume the learning of this course. He/she will be take to the place where he/she last left off.
3.3.3	Facilitator/s	Information noting course facilitator/s.This can be more than one person. Title should be customizable (instructor or facilitator or other) Graphic to show facilitator/s	This should take you to bio page.
3.3.4	Estimated Time	Time it takes to complete the course	N/A

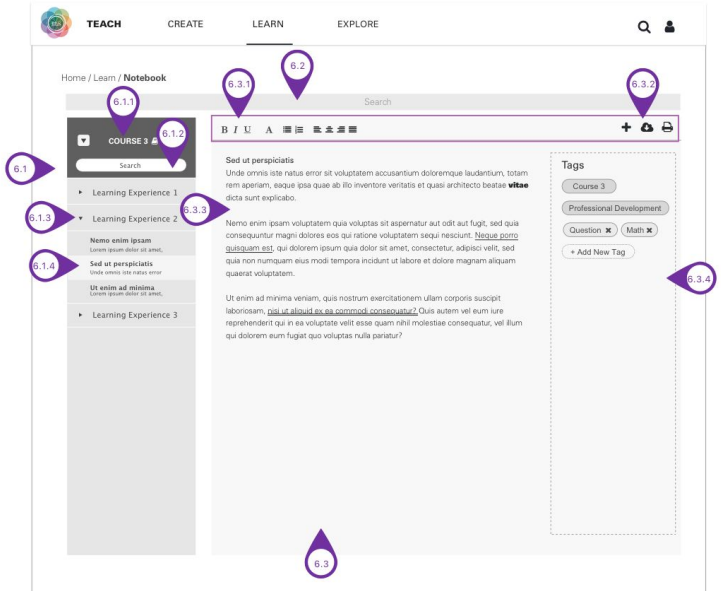
	3.3.5	Course infographic image	Thumbnail of course infographic that serves as navigation menu (8.3) in Course Page (Page 8)	A user clicks infographic to go to course detail page of this course.



ID	ELEMENT NAME	DESCRIPTION	ACTIONS
4.1	Video	Intro video to Ross professional development	A user clicks “Play” button to watch the video. When clicking “Play” button, the video goes fullscreen. On the top left/right corner of full screen, a user clicks “X” to exit watching video.
4.2	Image Carousel Menu	Displays clickable still Images of PD	Image Carousel can be horizontally scrolled to right or left. Images are clickable and they take you to the screen below.
4.3	“Explore the Courses” Button	Button to view Course List/s.	Click button and it automatically scrolls down to the section of the page where the cards of the courses are displayed.
4.4	Course Button	Button links to Course Details pages for designated course.	Provides a link to the Course Details page
		Search courses and LEs by pedagogy, content, global literacies. More exciting - perhaps push-in curated content via banner. See featured PD projects from portfolios, etc (ways to promote so they get interested) ?	

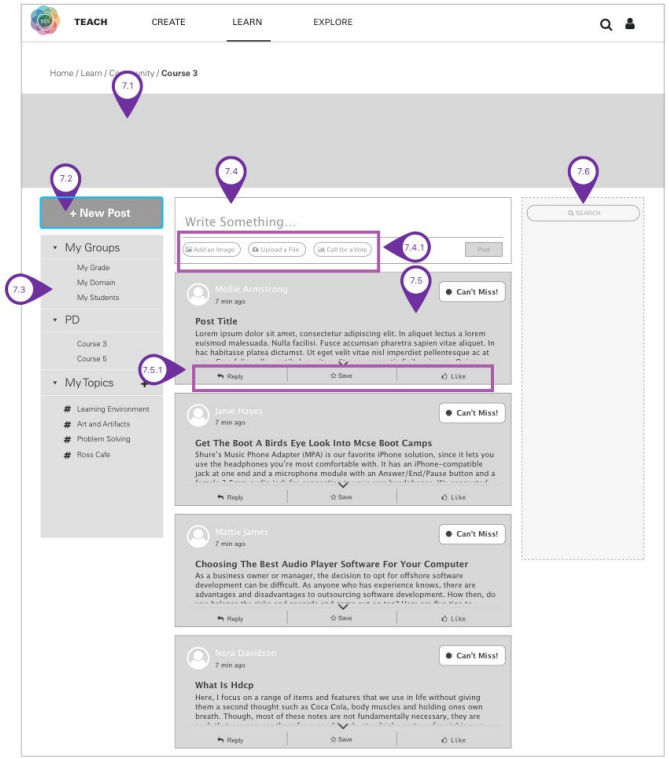


ID	ELEMENT NAME	DESCRIPTION	ACTIONS
5.1	Course Intro Video	Video provides introduction to the course	A user clicks “Play” button to watch the video. When clicking “Play” button, the video goes fullscreen. On the top left/right corner of full screen, a user clicks “X” to exit watching video.
5.2	Action Bar	Gives the user a short list of what’s included in the course	N/A
5.2.1	Start Learning Button	Provides a link to start learning the course	A user clicks “Start Learning” button to start learning the course.
5.3	Tabs	Feature, Instructor or Outline tabs	A user clicks any one of them to navigate between “Features”, “Instructor”, and “Outline”.
5.4	Course Feature Highlight	Graphic featuring written descriptions of main items that the course features	N/A

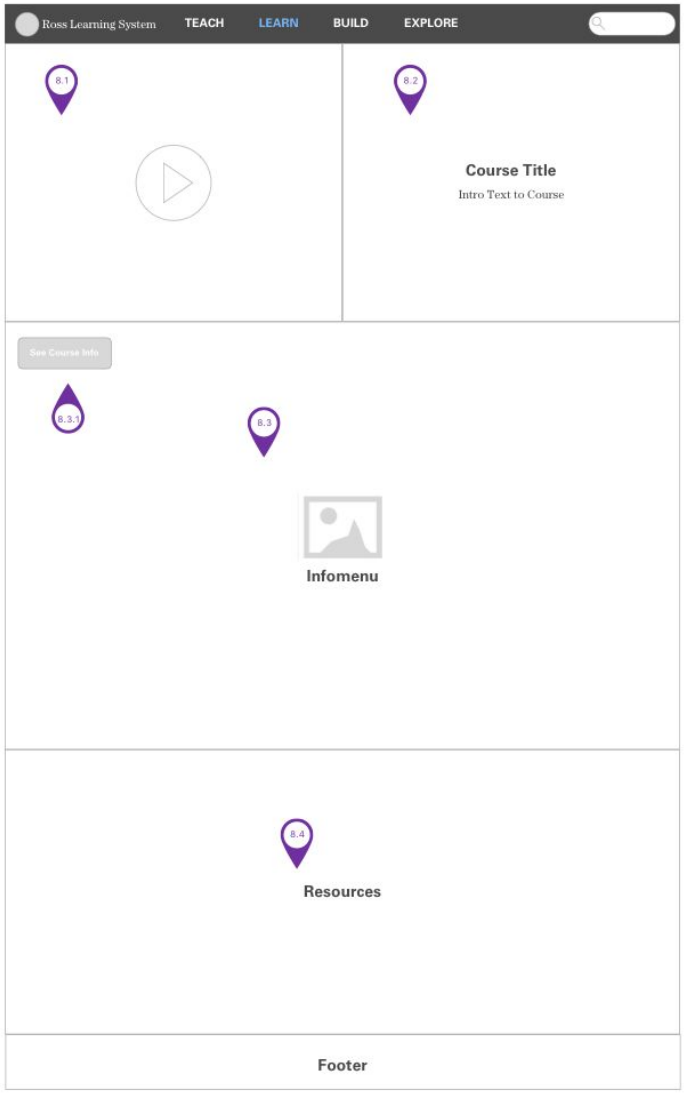


ID	ELEMENT NAME	DESCRIPTION	ACTIONS
6.1	Navigation Panel	A container to house the following items below	N/A
6.1.1	Notebook Selection Dropdown	A user could choose which notebook to use from this dropdown.	A user clicks dropdown to see the full list of notebooks, and then select a notebook to create/edit notes.
6.1.2	In-Notebook Search	User can search content within a notebook.	Typing in any word to initiates a search of content within this notebook.
6.1.3	LE Selection	A user selects a LE to see or to hide the full list of note within this LE.	A user clicks a LE title to uncollapse or to collapse the full list of notes within this LE. Question: If a user clicks a LE title to uncollapse the full list of notes, does this action automatically collapse other LEs' full list or not?
6.1.4	Note Selection	Select a note to add text to	A user clicks a note to select it, and on the right side it shows content of this note. (The user can then edit the content on the right side of this note.)
6.2	Search All Texts Input Box	Searches list of courses	Typing in a word initiates a search from all notebooks (Need wires) Typing in #word
6.3	Note Area	It is the space where a user could write notes	A user edits notes in this space. A user could edit, add tags, create new notes, export/download, and print notes. (It is a summary we could have or not.)
6.3.1	Format Bar	Format bar is where all text tools are displayed	Provide a Format bar with functional formatting tools for the user to write a note
6.3.2	Function Buttons	It contains icons which allows a user to create new notes, export/download notes, and print notes.	A user clicks "+" to create a new note. The new note lives in the same LE as the one before creating this one. A user could moves the note in the left side menu to other LEs. A user clicks "(download icon)" to download the current note as PDF file. A user clicks "(print icon)" to print the

				current note.
	6.3.3	Note Writing Area	Note Writing Area	A user writes and edits notes in this area.
	6.3.4	Tags	A user could attach tags to a note.	A user clicks “+ Add New Tag” to create a new tag. When a user create a new tag, it automatically applies to the current note. A user clicks “X” to detach a tag to the current note. A user cannot do anything to a tag without “X”. Those tags are attached to current notes by default.



ID	ELEMENT NAME	DESCRIPTION	ACTIONS
7.1	Banner	(TBD)	(TBD)
7.2	New Post Button		
7.3	Filter Panel		Filters Posts base on Learner's choice
7.4	Adding Posts	Where Learner initiates new posts easily	Learner can type directly into the input box and the box will expand vertically as the post accumulates
7.4.1	Add Multimedia Buttons	Where Learner adds multimedia materials	When clicked, Learner will be able to upload local files/images in a new pop up window. If "Call for Vote" is clicked, Learner edits the details of the vote in the new pop up window.
7.5	Post	Shows all existing posts	Filtered by Learner through the filter panel (7.3) on the left
7.5.1	Action Buttons	Where Learner take action toward a specific post	When "reply" is clicked, the post expands and allows an input box for Learner to type in reply. When "save" is clicked, the post is saved to Learner's personal repository, which shows in the filter panel (7.3) on the left
7.6	Search Panel (TBD)	(TBD)	(TBD)



ID	ELEMENT NAME	DESCRIPTION	ACTIONS
8.1	Course Intro Video	Intro video of the course, same as the Course Intro Video (5.1) in Course Detail Page (Page 5)	Once the Learner watched the video, this section will serve as Learner's dashboard. One possible design shown as below: 8.2	Course Info	Show title of the course and one sentence description	N/A
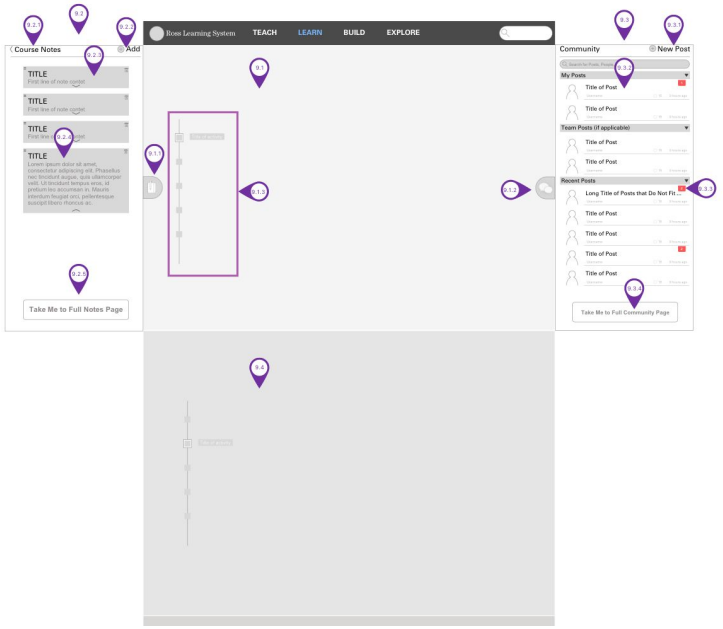
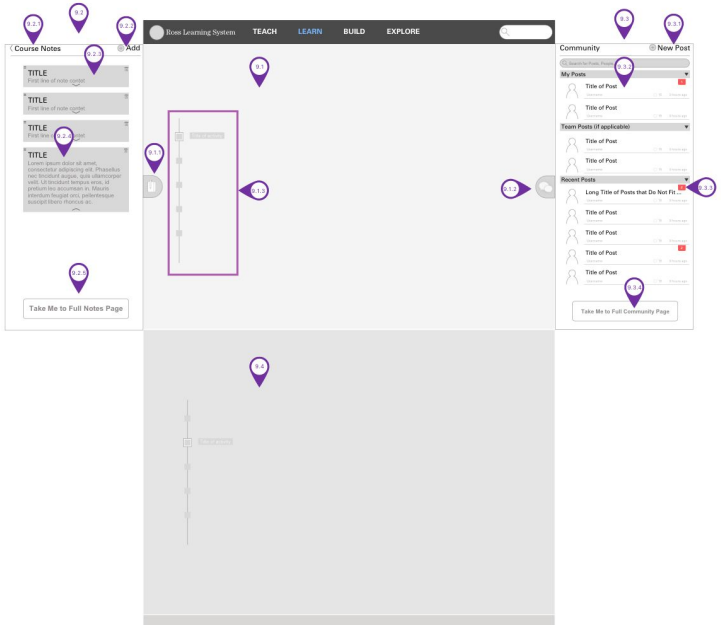
8.3	Infomenu	Main Navigation inside the course. Different design for each course. Shows the structure of the course, help Learners track their progress.	When elements in the infomenu are clicked, Learners will be taken to corresponding LE pages (Page 9) in a new window/tab
8.3.1	Show Course Detail Button	Displays course information	When clicked, an overlay appears on Infomenu (8.3) that displays detailed course information, including but not limited to Course Overview, Instructors, Enduring Understandings, Outcomes, Time Commitment, Content Summary and How to Pass.
8.4	Resources	Displays course related resources, including but not limited to DRL items and Glossary	Each item in this section shall provide links that direct Learner to the page inside RLS in another window/tab in the browser.



ID	ELEMENT NAME	DESCRIPTION	ACTIONS
9.1	Current Activity	The Activity the Learner is currently working on. Together with the Nav bar on top, it occupies the entire screen of the Learner's browser	Depending on the sophistication of the Activity, the Learner is going to perform all kinds of mouse actions on this area, typically clicking and dragging. See requirements for specific activities (TBD) for more details.
9.1.1	Notebook Button	The button used to call out Notebook Side Panel (9.2)	When clicked, the Notebook Side Panel (9.2) slides in and occupies the left side of the screen, while the Current Activity (9.1) is squeezed to smaller space on the right.
9.1.2	Community Button	The button used to call out Community Side Panel (9.3)	When clicked, the Community Side Panel (9.3) slides in and occupies the right side of the screen, while the Current Activity (9.1) is squeezed to smaller space on the left.
9.1.3	Progress Bar	Displays where the Learner is on this LE page and navigates between activities.	The Progress Bar is static on the page, and performs animation when Learner scrolls up or down to another activity. Also, Learner can navigate to different activities quickly by clicking the corresponding icon in Progress Bar.
9.2	Notebook Side Panel	LE specific, where Learners take notes while learning without leaving the page.	Hidden on the left by default; can be called out by clicking Notebook Button (9.1.1). Shows all notes made in this LE. All notes (9.2.3) are collapsed by default, except the new note Learner just created (9.2.4).
9.2.1	Course Notes Button	A button that provides Learner option to see notes taken in other LEs in this course	When clicked, the note panel shows a list of all LEs in this course that contains user notes.
9.2.2	Add Note Button		When clicked, creates a new note (9.2.4) on the bottom of all existing notes (9.2.3)
9.2.3	Note (Collapsed)	Previous notes made in this LE	Expands into uncollapsed state (9.2.4) when clicked
9.2.4	Note (Uncollapsed)	New notes created by Learner	Learner can type in notes directly



(This image is a Duplicate of the image in Previous Page)

9.2.5	Button	In case Learner needs to perform more sophisticated actions or manage notes	When clicked, launches in a new page/tab in the browser and navigates to Notes Page (Page 6)
9.3	Community Side Panel	LE specific, where Learners engages in collaborations and discussions without leaving the page.	Hidden on the right by default; can be called out by clicking Community Button (9.1.2). Shows all Posts by all Learners in Categories shown in wireframe.
9.3.1	New Post Button		When clicked, an overlay appears on Community Side Panel (9.3) where Learner can type in and send new post.
9.3.2	Post	Posts made by Learners while learning this LE	When clicked, the Community Side Panel (9.3) displays the full most, with all the replies made under this post by other learners
9.3.3	New Reply Notification	Hidden if there's none	Number indicates the number of replies the post got after the Learn's last visit
9.3.4	Button	In case Learner needs to perform more sophisticated actions in Community	When clicked, launches in a new page/tab in the browser and navigates to Community Page (Page 7)
9.4	Next Activity		All activities are stacked up vertically so Learner can easily navigate between them through scrolling. However, scrolling should take Learner directly from one activity to the other, and not allow user to stop in between. See the effect on https://elementk.studio for reference. In addition, the state of Progress Bar (9.1.3) should also change accordingly when the scroll is performed.
